ANUSHKA PHADNIS

SOFTWARE DEVELOPER

anushkaphadnis24@gmail.com | 🕲 +91-9575359533 | 📊 https://www.linkedin.com/in/anushkaphadnis

SUMMARY

Java Developer with 2.9 years of experience in analysis, design, development, documentation, implementation, and maintenance using Java 8, Spring framework, and front-end technologies such as React. Proficient in optimizing code for high performance and ensuring efficient and robust software solutions. Experienced in collaborating within team to deliver scalable and reliable applications. Committed to continuous learning, and staying current with industry trends and best practices.

PROFESSIONAL EXPERIENCE

Innova Solutions, Hyderabad

(Dec 2022 - Present)

Software Developer

- Engineered RESTful APIs with Spring Boot, enhancing backend functionality by adding 10+ features and enabling efficient communication with frontend.
- Fortified application security by developing secure APIs using Spring Security, reducing vulnerabilities and safeguarding user data.
- Defined and implemented React Forms with comprehensive validations aligning with business requirements, ensuring form accuracy and consistency, resulting in a 20% reduction in user input errors and amplified user satisfaction.
- Aware of React Routing and Lazy loading for modules and components.
- Collaborated in Agile environment, participating in daily stand-ups and contributing to sprint-based development.

Innova Solutions, Hyderabad

(July 2022 - Nov 2022)

Software Engineer Trainee

- Led the development of a challenging capstone project using Java, applying advanced programming techniques and software development best practices, contributing to a 20% increase in overall system efficiency.
- Diagnosed, debugged, and optimized code, reducing runtime by 30%, ensuring scalable and high-performance software.
- Simplified complex technical concepts for both technical and non-technical stakeholders, improving communication efficiency by 25%.
- Orchestrated effectively within a cross-functional team of 5, fostering a positive and productive working environment.
- · Streamlined code and database queries, reducing query time by 40%, significantly enhancing system functionality.
- Fostered strong relationships with peers and mentors, contributing to a collaborative and supportive team culture, with a 15% improvement in communication efficiency, ultimately enhancing project delivery timelines.

PROJECTS

Uber Freight | Java, Spring Boot, Microservices, MySQL, React

(February 2023 - Present)

- Daily Issue Resolution: Addressed and resolved a wide range of project-related issues on a daily basis, ensuring smooth progress and minimal downtime.
- Efficient Data Management: Crafted and upgraded queries for efficient data access and updates, significantly enhancing database performance and reliability.
- API Development and Testing: Actively involved in API development and Testing, utilizing RestClient and Postman to thoroughly test web services and ensure seamless integration and functionality.
- Code Reviews and Quality Improvement: Participated in regular code reviews, consistently contributing to maximized code quality, adherence to design patterns, and overall project success.

Recruitment Calendar | Java, Spring Boot, SQL Server, Maven

(September 2022 - Dec 2022)

- Worked as Java/J2EE Developer and Analyzed the client requirements.
- Developed an application to track the recruitment based events and Role based approval system.
- Wrote Optimised queries to increase the data retrieval efficiently. Wrote mail and cron jobs to send confirmations.
- Involved in various phases of Software Development Life Cycle (SDLC) of the application like Requirement gathering, Design, Analysis and Code development.

SKILLS

- Programming Language: Java
- **Frameworks**: Spring, Hibernate, JPA, Spring Boot with Microservices
- IDEs: IntelliJ, Eclipse, STS
- Version Control :Git/GitHub
- **Web Development**: HTML, CSS, React, JavaScript, Bootstrap
- Databases: SQL, Microsoft SQL Server
- RESTful API Design, JUnit
- Agile/Scrum Methodology
- Java EE design patterns (MVC, Singleton, DAO)
- Code Optimization and Performance Tuning
- Collaboration and Communication
- Postman, Swagger and similar tools
- Build Tools: Maven, Gradle

EDUCATION

Bachelor of Technology in Computer Science
